

RIDDHI ZUNJARRAO

AI & Full Stack Developer

☎ +91-9082212740 ✉ riddhizunjarrao669@gmail.com 🔗 linkedin.com/in/riddhizunjarrao 📄 github.com/riddhi-z1465

Summary

Aspiring ML/AI Engineer and Full Stack Developer with experience building AI-powered applications using Retrieval-Augmented Generation (RAG), vector databases, Large Language Models (LLMs), and modern web technologies. Skilled in Python, JavaScript, NLP, semantic search, and cloud-based application development. Passionate about leveraging AI and cloud technologies to develop intelligent, scalable solutions that solve real-world problems.

Skills

Programming Languages: Python, JavaScript, Java, C++

AI / ML: Machine Learning, Natural Language Processing (NLP), Generative AI, Retrieval-Augmented Generation (RAG), Vector Embeddings, Semantic Search, Prompt Engineering

Frontend Development: HTML5, CSS3, JavaScript, Next.js, Tailwind CSS

Backend Development: Node.js, Express.js, REST APIs

Cloud & AWS: AWS S3, AWS EC2, AWS Lambda, AWS Bedrock (Learning)

Databases: PostgreSQL, Supabase, MongoDB, MySQL, Firebase

Tools & Platforms: Git, GitHub, Vercel, Netlify

Soft Skills: Problem Solving, Communication, Team Collaboration

Experience

Vibe Coding Intern

December 2025 – Present

AA Immersive

Remote

- Built and deployed 5+ full-stack web applications using Firebase Authentication, Firestore, and cloud services, improving development efficiency by 30% through reusable components.
- Designed Firebase Realtime Database architecture supporting 5+ applications and 100+ user interactions, enabling real-time synchronization and improving backend data consistency and performance.
- Enhanced responsive web interfaces to achieve 100% mobile compatibility and reduced average page load time by 25%.
- Improved application stability through systematic debugging and testing, reducing bug resolution time by 30% and contributing to 10+ production-ready features.

Projects

Recall Lite – AI-Second Brain Application | Next.js, Supabase, PostgreSQL (pgvector), Groq Llama 3.3 70B

2025

- Built an AI-powered knowledge management system enabling users to store and query 500+ web resources using conversational search.
- Applied Retrieval-Augmented Generation (RAG) pipelines with vector embeddings and semantic search for context-aware retrieval.
- Expanded document chunking and indexing workflows using PostgreSQL pgvector, enabling sub-second similarity search across large datasets.
- Integrated Groq Llama 3.3 70B to generate grounded answers, summaries, and question-answering responses with proper source attribution.
- Enforced secure multi-user access using Supabase Authentication and Row-Level Security (RLS).
- Improved retrieval ranking logic, reducing irrelevant results by 30%.

WeSafe – AI-Powered Women Safety Platform | Flutter, Firebase, Twilio, Google Maps API

2026

- Built a mobile safety application with SOS alerts, emergency communication, and live location tracking features.
- Integrated Twilio APIs to send SMS and voice calls to up to 5 emergency contacts within seconds of SOS activation.

- Integrated Google Maps API and Firebase backend services to enable real-time location sharing for emergency response tracking.
- Expanded backend architecture supporting authentication, contact management, and emergency alert workflows for 100+ users.

Education

B.Tech in Computer Science and Engineering	2024 – 2028
<i>ITM Skills University</i>	<i>Navi Mumbai, India</i>
